ANNEX – Statistical overview

REPORT ON HUMAN RESOURCES MANAGEMENT

I. INTRODUCTION

1. Effective human resources management continues to underpin the efficiency of the Organization and the effective delivery of programme and operational activities in support of the IOM Strategy. The importance of human resources management has been amplified over the reporting period as a number of critical organization-wide reforms took place, including the structure reform and the development of the unified Staff Regulations applicable to all IOM staff members.

2. The implementation of the staff rotation policy continued in 2010. One of the objectives of rotation has been the placement of senior managers from Headquarters in the Field and a corresponding transfer of Field colleagues to key positions at Headquarters. This movement of senior officials bodes well for improved coherence between Headquarters and the Field. At the same time, it is recognized that rotation has placed additional pressure on the Organization in terms of its structural and financial capacity to absorb change. The Administration will therefore take into consideration lessons learned in next year's rotation exercise, in particular to manage the impact of restructuring.

3. The Human Resources Management Division (HRM) teams in Manila and Panama have continued to provide operational human resources support to the IOM Field Offices, while the HRM team at Headquarters has focused on a number of policy reforms and other activities that seek to enhance human resources management in IOM. Specific activities include the following:

- (a) Finalization of a unified version of the Staff Regulations for all IOM staff.
- (b) Review of the existing Performance Development System together with the first steps taken towards the development of a new and integrated system that will embed staff evaluation within the broader managerial architecture of the Organization.
- (c) Completion of the second year of the annual rotation exercise supported through the development and use of the Rotation Management System software, which operates as an electronic database for storing relevant information and producing related reports and statistical data.
- (d) Active HRM engagement in the structural review at Headquarters and in the Field Implementation Team.
- (e) Ongoing support for rapid deployment of staff in response to emergencies in Haiti and Pakistan.

II. IOM STAFFING

Vacancies and placements

4. During the period under review, there was no significant change in the staff strength of the Organization: 7,735 in June 2009 and 7,699 at the end of June 2010, representing a 0.5 per cent decrease in the number of staff over the year. Between January 2009 and June 2010, IOM issued 94 vacancy notices for officials and recruited or placed 73 officials through

internal (51) and external (22) advertisements. Furthermore, 8 vacancy notices were placed for General Service staff at Headquarters and 56 short-term vacancy notices were issued for officials. Recruitment activities were weighted towards the recruitment and deployment of staff to support IOM's response to natural disasters and post-crisis activities, in situations such as the aftermath of the earthquake that struck Haiti in January 2010, and to meet staffing needs in Afghanistan, Pakistan, Sri Lanka and Sudan.

Associate Experts

5. During the period under review, five new Associate Experts funded by the Governments of Italy, Japan, Sweden and the United States of America joined IOM, bringing the total number of Associate Experts deployed within the Organization to 23. IOM's Associate Experts Programme comprises 16 agreements with donor countries and fosters the link for matching donor priorities with ongoing and potential IOM programmes, providing a valuable opportunity to achieve mutually beneficial developmental goals. As a result of the ongoing initiatives by the Organization to encourage donors to fund Associate Experts from developing countries, the Italian Government funded a national of Zimbabwe under the Programme. Administrative procedures are under way for a further three Associate Expert positions to be filled. The Organization retained two Associate Experts during the reporting period.

Staff exchanges, secondments and loans

6. A total of 29 people were seconded to or from IOM during the reporting period. The secondments to IOM included one senior official from the Ministry of Justice of the Netherlands who was deployed to Haiti. In addition, 20 staff were seconded from SYNI¹ to IOM. Of these, 14 have been deployed at Headquarters and 6 have been deployed in Field Offices in Eastern Europe. Discussions leading to the secondment of a researcher from the Migration Policy Institute to work for IOM were initiated during the reporting period. IOM seconded officials to the Global Forum on Migration and Development, the International Labour Organization (ILO), the World Health Organization and the World Intellectual Property Organization and is also discussing the loan of a Legal Officer to the United Nations Office for Project Services with cost coverage provided by the Office.

The IOM Internship Programme

7. The IOM Internship Programme continues to be a valuable source of support to IOM's core expertise, providing students or recent graduates with the opportunity to learn about the Organization's activities and to gain initial work experience. During the reporting period, 70 interns were hosted at Headquarters and 123 in the Field from a wide range of educational backgrounds and nationalities. In addition, new agreements for hosting interns have been signed with the Nagoya University and the Tokyo University of Foreign Studies in Japan.

¹ SYNI is a non-profit-making professional project carried out by Lausanne City Council which offers motivated professionals the possibility of participating in formative international cooperation assignments in Switzerland and abroad. To that end, it facilitates short-term subsidized assignments for professionals residing in Switzerland and interested in acquiring international work experience. SYNI is funded and commissioned by the Swiss State Secretariat for Economic Affairs (SECO) and Lausanne City Council.

Rotation

8. The 2009 rotation list was made up of 61 officials and included rotations that had been deferred from the 2008 exercise. A total of 33 officials were rotated as part of this cycle and out of these 26 officials were eligible for rotation. The remaining seven rotations were a result of necessary changes in the structure or emergency rotations brought about by the specific needs of some projects. Officials whose rotation was deferred from the 2009 rotation process will be included in the next rotational cycle. The Administration and the Staff Association Committee held several consultative meetings including a one-day retreat with senior managers to address issues related to staff mobility and rotation and to examine lessons learned from the first rotation exercise. Participants were aware that the rotation process had required a significant cultural change for the Organization and also recognized that the management of the next rotation cycle, together with the implementation of the structural review recommendations, will require a great deal of consultation and coordination in 2011.

III. EFFECTIVE HUMAN RESOURCES SERVICE DELIVERY

HRM policy and services

9. During the reporting period, the Human Resources Policy and Systems Unit, working in coordination with the Office of Legal Affairs and the Staff Association Committee, finalized the revised unified version of the Staff Regulations that will apply to all IOM staff at Headquarters and in the Field. A summary document explaining the new Regulations and comparing them to the previous Regulations for officials and employees will be submitted to the Standing Committee on Programmes and Finance for review and submission to the Council.

10. In the past year, the following additional policies and guidelines were developed and implemented:

- (a) The IOM policy and guidelines on employment contracts were reviewed and standardized. The revised guidelines define the different types of contracts and associated entitlements and regulate the conditions required to obtain each type of employment contract. A new fixed-term contract for two years was introduced and the conditions for granting regular contracts with no fixed period of employment were modified to require, among other things, a minimum of 10 years of continuous service instead of the 5 years required under the previous instructions.
- (b) New guidelines defining the administration of sick leave and submission of sick leave requests under the human resources information system (PRISM HR) were developed.
- (c) New instructions to establish uniform and transparent rules related to the appointment and employment of close relatives of IOM staff members, while respecting the principle of non-discrimination, were established.
- (d) A policy to update and clarify the mandatory nature of IOM's internal controls for payroll management and other financial procedures was instituted.

Staff well-being, health insurance and improved working conditions

11. During the year under review, IOM joined the Dual Career and Staff Mobility Programme as part of an initiative to support officials moving to various duty stations as part of the rotation process. The Programme is supported by the United Nations system and partnering organizations to assist globally mobile families to adapt to new duty stations and to help expatriate spouses/partners find jobs and maintain their professional careers.

12. Agreements were concluded with additional hospitals in Switzerland, the Philippines and Kenya, to facilitate admission procedures and improve the cost-effectiveness of health services. Other agreements are being negotiated in other IOM Field locations.

13. The extension of the Medical Service Plan health insurance coverage to IOM Field Offices is still in progress. Twelve additional offices have been enrolled in the Plan during the reporting period. A total of 115 Field Offices are now enrolled, with 6,148 participants (staff members and eligible dependants).

14. In response to the increasing risks of violence against humanitarian workers and exposure to traumatic events, the Occupational Health Unit (OHU) and the Health and Insurance Medical Unit (HIM) in Manila delivered and participated in different training activities for staff (first aid training for drivers; tactical emergency first aid training; security training for frequent female travellers) to reduce risk exposure and allow better initial reactions that can save lives. To minimize post-traumatic stress among staff, OHU/HIM also offered stress management and medical support to offices in Afghanistan, Haiti, Myanmar, South Africa and Sri Lanka in coordination with Stress Counsellors from the United Nations Department of Safety and Security's Critical Incident Stress Management Unit. A stress management booklet focusing on staff working in conflict zones was produced to help staff cope with stress under traumatic conditions.

Staff relations

15. HRM has continued to work closely with the Staff Association Committee. Regular meetings are convened between the Administration and the Staff Association Committee and HRM has sought to be proactive in addressing issues and concerns raised by the Committee in relation to staff matters.

16. At the beginning of the year HRM initiated the Staff Welfare Group,² which meets once a month to address and initiate strategic mechanisms to help staff members and management cope with difficulties and problems which, if left unresolved, could adversely affect the work and effectiveness of Offices and the Organization as a whole.

17. In relation to staff grievances, the Joint Administrative Review Board received 10 appeals in the 12 months ending on 30 June 2010. No complaints were filed with the ILO Administrative Tribunal.

² The Staff Welfare Group is composed of the Ombudsperson, the Gender Officer, the Head of the Staff Development and Learning Unit, the Head of the Occupational Health Unit, the Policy Specialist, the Legal Officer and the Insurance and Provider Specialist and is chaired by the Director of HRM.

Staff development and learning

18. The Training Advisory Committee was established in October 2009 with the aim of providing guidance on the overall orientation of Staff Development and Learning Unit (SDL) initiatives. The Committee has been consulted several times during the reporting period, and its recommendations have been embedded in the overall application of staff development and learning tools.

19. Continuing the trend established in 2009, Phase 2 of the IOM Project Management Training Package is now delivered in Field Offices in order to facilitate staff access by reducing travel costs. Five sessions were organized in 2009,³ as opposed to four in 2008.⁴ Six sessions are planned for 2010, one in Geneva and five in the Field.

20. Recognizing the complex role that IOM Chiefs of Mission have to play, SDL has advocated for a modular approach for targeted and meaningful training for Chiefs of Mission. As such, the first module “Managing IOM Resources” will be piloted in October 2010, with new modules on managing the security of IOM Staff, operations, media and mediation skills planned for delivery in 2011.

21. The Performance Development System was reviewed at the end of 2009 by a group of Resources Management Officers and HRM Specialists in Manila and Panama. Taking on board the recommendations of this review, HRM and SDL have now taken the first steps in developing a more robust system that will embed staff evaluation within the broader managerial architecture of the Organization. The intention of the IOM Administration is to launch the new system in the first half of 2011.

IV. CONCLUSION

22. The coming year will present heightened challenges for the Administration as it implements the Field re-structuring procedures. It is anticipated that recent and ongoing reforms such as the new Staff Regulations and the implementation of a new staff evaluation system will facilitate HRM’s support to this implementation process. HRM continues to take important steps towards improving the quality of human resources management in IOM.

³ Sessions were organized in Brussels, Geneva, Manila, Nairobi and Panama.

⁴ All these sessions were organized in Geneva.
