

Statement

Mr. President,

Ladies and Gentlemen,

The Arab region is one of the world's most impacted areas regarding global migration dynamics. Current figures show that our country hosts around 41 million migrants, and being the origin of nearly 33 million migrants, as well serving as a transit hub for millions more.

Behind these numbers exist complex Economic, Social and humanitarian crises that cast shadows over our people.

Wars, conflicts and climate change are primary drivers of migration. Unfortunately, the Arab region is witnessing conflicts and crises that have increased migration rates. Set us, genocide war in Gaza, and war of aggression against Lebanon.

We cannot overlook the ongoing tragedy and devastating war in Sudan. The crises in the region are not only humanitarian challenges but also represent long- term developmental burdens requiring concerted efforts and rethinking to address it effectively.

In response to these challenges, The Arab league is enhancing its role in coordinating regional and international efforts to address migration issues. In this regard, We held the Second Regional Review Conference of the Global Compact for Safe, Orderly and Regular Migration in collaborating with IOM.

In conclusion, we emphasize the importance of tackling the root causes of migration flows. Moreover, we underscore the need to link migration and development by adopting developmental approaches, aiming to achieve a sustainable and secure future for migrants and displaced persons.

Also, we call on the international community to strengthen its support for our affected countries and collaborate to ensure safe and orderly migration for the future.

Thank you.
