MIDAS as a Border Management Information System:

- Improves border facilitation and control

- Supports data sharing and policy planning

- Cost-efficient and customizable

- Exclusive control of recorded data by governments

What is MIDAS?

The United Nation user friendly and fully customizable Border Management Information System. Developed by IOM, with a proven track record.

Governments collect, process, store, analyze and share **biographic / biometric** data:

- Real time monitoring of entry/exits
- Sound statistical basis for migration policy
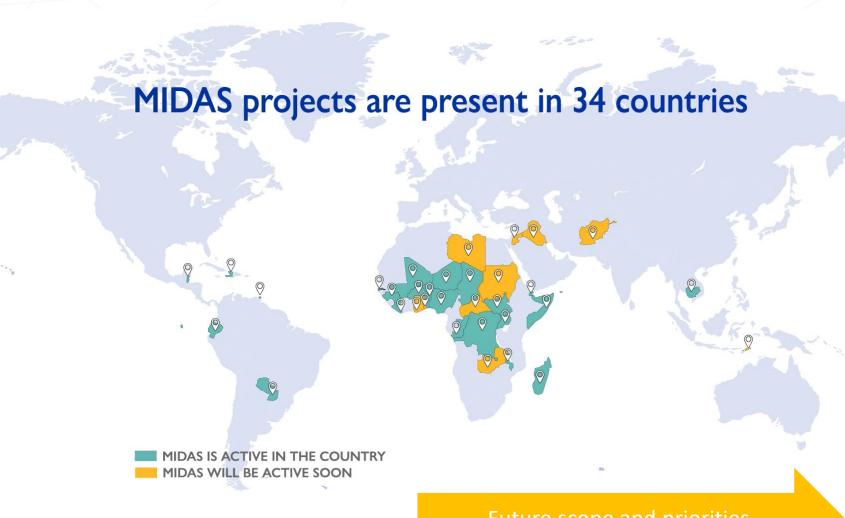

MIDAS contributes to:

- **Target 9.1:** Develop quality, reliable, sustainable and resilient **infrastructure**, including regional and trans-border infrastructure.... to support economic development and human well-being...

- **Target 10.7**: **Facilitate** orderly, safe, regular and **responsible migration and mobility of people**, including through the implementation of planned and well-managed migration **policies**.

- **Target 17.18:** Enhance capacity-building support to developing countries to increase significantly the **availability** of high quality, timely and reliable **data**.....

- **Objective 1:** Collect and utilize accurate and disaggregated **data** as a basis for evidence -based policies.
- **Objective 4:** Ensure that all migrants have proof of **legal identity and adequate documentation.**
- **Objective 5:** Enhance availability and flexibility of **pathways for regular migration.**
- **Objective 11:** **Manage borders** in an integrated, secure and coordinated manner.
- **Objective 12:** Strengthen **certainty and predictability** in migration procedures for appropriate **screening, assessment and referral**.
- **Objective 23:** Strengthen **international cooperation** and **global partnerships** for safe, orderly and regular migration.
